Work Experience

Founding Software Engineer (Tech Head)

Applix AI

Nov 2024 - Present | Hyderabad, India

- Leading Technology for Applix Manufacturing OS (mOS), architecting Agentic AI systems across Cognition, Perception, and Actuation layers.
- End-to-end product ownership: requirements, system architecture, development, deployment, customer presentations, hiring, and roadmap strategy.
- Engineered Factory Acceptance Test (FAT) Voice AI system with intelligent processing, template automation, in-app Canvas PDF with attachments view, and async sign-offs — contributing to multi-million dollar enterprise deals.
- Built Agentic Defect Management System (DMS) with Voice-based defect logging and context-aware RCA & CAPA automation.
- Developed AI Defect Detection MVP using Computer Vision, ML, & Augmented Reality for manufacturing clients.
- Built IoT-based Smart Irrigation System (Drizzl) integrating device communication, sensor telemetry, and weather APIs.
- Designed Intelligent Supply Chain and Inventory Management system for enterprise customers with Predictive Disruption in Supply Chain sourcing and Tariffs uncertainty.
- **Tech Stack:** Python, FastAPI, RAG, LangGraph, Agentic AI, Swift, MongoDB, ARKit, Computer Vision, ML, NLP

Co-founder, Full Stack Developer

Okun Shop (Stealth)

Jun 2023 - Oct 2024 | Hyderabad, India

- Worked on creating the Open Network Digital Commerce for Local Stores to list themselves as an Entity and sell their products online.
- Involved in requirements collection, customer interaction, application design and development.
- **Technologies Used**: Python | FastAPI | Flutter | Dart | MongoDB | Firebase

Software Engineer 2

Microsoft

Feb 2021 - Jun 2023 | Hyderabad, India

- Worked & Owned 2 of the major backend services for OneNote.
- Migrated the complex OneNote Add-ins authorization from ADAL(Active Directory Auth Library) to MSAL (Microsoft Auth Library).
- Developed the highly critical and customer demanding inking features for OneNote online using both stylus and touch.
- Won Org wise Hackathon twice in successive Quarters.
- **Technologies Used**: C# | .NET | Python | ReactJS | TypeScript

Technology Analyst

Goldman Sachs

Nov 2019 – Feb 2021 | Bangalore, India

- Developed referral service for **Marcus Bank Savings Customers** with Referral Code Generation, Evaluation, Fulfillment and Stacking.
- Developed Account Closure for different types of Savings Accounts.
- Improved the Profile Service to deal with PII data.
- **Technologies Used**: Java | SpringBoot | ReactJS | MongoDB

Software Engineer, Innovations Labs

Cotiviti

Sept 2018 – Oct 2019 | Hyderabad, India

- Worked on **FWA application** to intelligently detect **Frauds, Wastes & Abuses** by healthcare providers while processing insurance claims.
- Designed, Developed and Deployed **Jarvis Bot** that imitates the role of an agile scrum master.
- Designed, Developed and Deployed **GithubBot** to fulfill user actions' invoked from slack.
- **Technologies Used**: Python | Django | AWS | Terraform

Software Engineer

Cerner Corporation

Aug 2017 – Aug 2018 | Bangalore, India

- Developed a search engine to make in-context semantic search for patient's clinical documents and results in **ChartSearch** Application.
- Developed a web application **"Nethra"** that tests the functionality of any other web application using Capybara and PhantomJS.
- **Technologies Used:** Python | Django | AWS | RoR

Founder & Full Stack Developer

KodeFork

Aug 2016 – July 2017 | NIT Calicut, Kerala, India

- Developed an online portal to provide people a learning platform, a questionnaire community, an option to read and write articles and an online IDE for practicing codes. Implemented social logins using OAuth and also did SEOs.
- **Technologies:** Python | Django | JS | PostgreSQL

Summer Intern

Cerner Corporation

May 2016 – July 2016 | Bangalore, India

- Developed **"Network PathChecks"** portal to keep track of all failure nodes and assigning them to associates for rectification.
- Implemented live tracking of assigned issues and client side search to make search faster.
- **Technologies:** PHP | MySQL | jQuery | Bootstrap

Skills

AI & Tools
LLM | Prompting | RAG | LangChain | LangGraph | Agentic AI | Computer Vision | ML | NLP | ARKit

Proficient In
Python | FastAPI | System Architecture | DS & Algo | MongoDB | Java | Django

Experienced With
React/Next.js | C# | .NET | Swift | Azure

Familiar With
Expo & React-Native | Flutter & Dart | Ruby & RoR | PHP | JavaScript | MySQL | Terraform | PostgreSQL

Platforms

StackOverflow (Top 3% in World Overall)

- **Silver** badge for **Django** (Top 100 Contributor).
- **Silver** badge for **Python**.

Education

B.Tech in Computer Science

NIT Calicut, Kerala, India

August 2013 – May 2017
